

Professional Summary

My friends often describe me as someone who brings lightness and positive contributions to the environment. I see myself as sincere and guided by transparency in everything I do. Looking ahead, I aim to combine my motivation to grow in the field with the resilience I've built through life's experiences, along with my drive to seek better, cohesive solutions to challenges, listen and learn from others, and contribute with my best.

Professional Skills

HTML, CSS (including Bootstrap, Tailwind and Styled Components), JavaScript, TypeScript, React, Redux(toolkit), Next.js, MUI and various others Component Libraries, Unit-Testing, NodeJS, Express, PostgreSQL, MongoDB, Firebase, REST APIs, Git, GitHub, Agile methodologies.

Professional Experience

2023: Frontend Internship (Israel Tech Challenge Program)

- Completed a 3-month internship with mentorship focused on React and frontend workflows.
- Participated in code reviews, mentorship sessions, and best-practice guidance aligned with industry standards.
- Assisted in building and maintaining React components, ensuring consistency with project requirements and design standards

2024-Now: Freelance Front End Developer.

- Developed and deployed responsive landing pages for small businesses, focusing on clean design and usability.
- Collaborated with a designer to build pages for an e-commerce project, applying provided UI/UX layouts into functional components using React.
- Guided a potential client on project structure and best practices during an interview, demonstrating strong problem-solving and consulting skills.

Education

2022-2023: Full Stack Program, Israel Tech Challenge (ITC).

Hybrid, intensive course combining in-person and online learning. Provided structured guidance from experienced instructors while fostering collaboration, self-directed learning, and adherence to industry best practices. Gained hands-on experience building full-stack projects with modern technologies.

2013-2017: B.Sc studies Transportation and Logistic Engineering - Federal University of Santa Catarina.

Prepared for a career in planning, design, construction, operation, maintenance, and management of passenger and cargo transport, with a strong foundation in interdisciplinary engineering fields, emphasizing teamwork, as well as creative and sustainable solutions to modern challenges.

Additional Information

- Languages: Portuguese - Native | English - Fluent | Hebrew and Spanish - Working Proficiency.
- Spent 4 years as an engineering student at the 8th-ranked university in South America, successfully balancing rigorous academic demands with work responsibilities. Developed strong analytical skills and mastered complex technical concepts.
- Between 2017–2021, I focused on music and audio production, performing professionally, giving lessons, recording, and serving as musical director for two films, while developing skills in project management, collaborative workflows, creative problem-solving, and autonomous learning of audio softwares
